SKILLS

NodeJS
NextJS
.Net Core
Php
Java
Angular
FastAPI (Python)
PostgreSQL, SQLite, MySQL,
MongoDB, MsSQL, MariaDB
C, C#, TypeScript, JS,
Bootstrap, Tailwind
Linux
AWS (S3, Lightsail, Amplify)
Stripe
Vercel
Postman, Swagger

LANGUAGES

Turkish
Native
English
Upper-Intermediate

EDUCATION

Computer Engineering

Institution: Istanbul Okan University

Year: 2020-2025

Current Grade: 3.28

WORK

SOFTWARE DEVELOPER - Part Time GENERATECH STUDIO

July 2024 - Present

CHIEF TECHNOLOGY OFFICER STOCKING AI

September 2024 - January 2025

FULL-STACK DEVELOPER STOCKING AI

September 2023 - September 2024

PERSONAL PROFILE

I have been actively working in the field of software development since 2019. Throughout this journey, I have dedicated myself to mastering Java, .NetCore, NextJS, NodeJS, PostgreSQL, MongoDB, and MySQL technologies. Through intensive work with these technologies, I have developed strong skills in complex backend systems, modern web applications, and database management. I have gained robust experience in integrating these technologies in full-stack development processes to create scalable and performant solutions.

In developing my technical competencies, I started with the C programming language and successfully completed Cisco Networking Academy courses (Introduction to Cybersecurity, NDG Linux Unhatched, CCNAv7: Introduction to Networks, CyberOps Associate) under the leadership of Akbank Youth Academy. I have also built projects using Angular, Python, Java swing, Php technologies.

Additionally, I have gained experience with modern tools including Firebase Web API, Postman, Swagger, Stripe, AWS (S3, Lightsail, Amplify), Vercel, and Github.

I started at StockingAI as a FullStack Developer in September 2023.

I worked as Chief Technology Officer from September 2024 to January 2025.
